Persian in Use is an elementary Persian language and culture textbook designed for first-year language students at a

university level and specifically focused on teaching contemporary Persian as it is actually used. With its colorful and lively design, the textbook offers an integrative approach combining new vocabulary summarized thematically and lexically, interactive dialogues, straightforward explanations of grammatical features, engaging classroom and homework exercises, and samples of literary and popular writings.

"With a steady stream of relevant dialogues, a series of pithy passages of reading material, glimpses of Persian culture and literature, and plenty of engaging exercises, all creatively conceptualized and methodically presented, Persian in Use is bound to find a prominent place in the increasingly professionalized field of Persian language pedagogy."
