**National Geographic Maps - Adventure : Peru (National Geographic Adventure Map)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Peru (National Geographic Adventure Map):

8 of 8 people found the following review helpful. Nice quality but didn't use it muchBy Allan NYCVery nice quality map, but plastic coating, while lending durability, prevented me from marking or using a highlighter on the map... but things I like to do when planning trips. Ended up using our Marco Polo map for all purposes. I think the NG map is better for inspiring your trip and helping you decide, "visualize", your route in advance, but you should have a Michelin or Marco Polo quality map for actual nagivation purposes (of course GPS helped while we were en route, but we used our "big map" to determine how WE wanted to travel and then used GPS to help us stay on our chosen route.8 of 8 people found the following review helpful. Sturdy and Detailed!By NatashaMy daughter and husband just went on a mission trip to Peru and they went to a tiny mountain village that most people have not heard of....but it was on this map! Very detailed and lined with a waterproof coating, it has been well used and is surviving well. My boys and I tracked their trip from home, learning a little about every town they stopped at and how to track elevation on a map. Great little map, the 'adventure line' has more details than the other maps, I will be buying more of these.3 of 3 people found the following review helpful. Good detail and quality - but photos placed over parts of the mapBy TRVery detailed, including many small communities. Material is also very nice quality. My only gripe is that they include two photographs over parts of the map. Technically they do not cover up anywhere in Peru, just adjacent areas in Ecuador and Colombia, but I find it a very poor decision to omit any potentially useful section of map for an unnecessary image. A serious cartographic faux pas.

Waterproof Tear-Resistant Travel MapNational Geographic's Peru Adventure Map provides global travelers with the perfect combination of detail and perspective. Hundreds of points of interest and diverse and unique destinations are highlighted including World Heritage sites, archeological sites, churches, museums, and more. This map includes the locations of thousands of towns and villages, plus a clearly marked road network complete with distances and designations for highways and roadways. Rough tracks that require four-wheel drive vehicles and paths are included for adventurers seeking to explore more remote regions. National parks and reserves, wildlife centers, beaches, caves, waterfalls, and spas are clearly indicated so travelers can take advantage of Perus many natural attractions and activities.The northern half of the Peru map includes the regions of Loreto, Tumbes, Piura, Amazonas, Lambayeque, Cajamarca, La Libertad, Ancash, Hunuco, and Ucayali. This section of the map spans from Peru's borders with Ecuador and Colombia on the north and Brazil on the east, down to the coastal city of Chimbote. The regions of Tacna, Puno, Pasco, Moquegua, Madre de Dios, Lima, Junn, Ica, Huancavelica, Cusco, Ayacucho, Arequipa, and Apurmac are included on the southern half of the map. In the language of the Quecha Indians, Peru means land of abundance. Situated on the Pacific coast of South America just south of the equator, it was home to the great Inca empire which was destroyed in the early 16th century by Spaniards who pillaged the region of gold and silver to build their own empire. Today, Perus abundance is measured in natural resources. Its fisheries are some of the worlds richest. The country is also home to one of the worlds oldest petroleum industries and is one of the top producers of silver, lead, and zinc. Perus geography if varied, from arid coastal plains to the majestic peaks of the Andes mountains and the tropical forests of the Amazon basin.Every Adventure Map is printed on durable synthetic paper, making them waterproof, tear-resistant and tough capable of withstanding the rigors of international travel.Map Scale = 1:1,650,000Sheet Size = 37.75" x 25.5"Folded Size = 4.25" x 9.25"

About the AuthorFounded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
