Arno Peters : Peters Equal Area World Map 39.5"x 50" laminated gift-tubed [July, 2014] by Arno Peters; Includes explanation by ODTmaps and Oxford Cartographers before purchasing it in order to gauge whether or not it would be worth my time, and all praised Peters Equal Area World Map 39.5"x 50" laminated gift-tubed [July, 2014] by Arno Peters; Includes explanation by ODTmaps and Oxford Cartographers:

0 of 0 people found the following review helpful. World map By Mrs. Law I'm happy to have purchased a map that shows each continent in a more realistic size. I would've given the map five stars but the continents appeared to be squeezed. 0 of 0 people found the following review helpful. Peters Equal Area World Map (Awesome!) By M. Sims This product was received on time and in great condition. This Map is incredible and I am very satisfied with the product. MS 0 of 0 people found the following review helpful. Worth the purchase By Rev Lennox Thomas Outstanding piece of work! My children love the map as much as I do.

This format of this updated 2014 Peters Projection Equal Area map comes laminated (3 mil, edge seal). There is also an AMAZON listing for a gift-tubed version....same map, in a blow-molded plastic screw tube. This new version of the Peters Map is 39" x 50" and is 30% larger than previous version of the Peters wall map. It includes the cartographic updates as of June 2014 (previous smaller version with extra side panel was published in 2008). The Peters Projection World Map is an equal area projection. That means that one square inch anywhere on the map is an equal number of square miles. All the countries of the world are represented at true size and true proportion. This is one of the few commercially available maps that is fair to all peoples. Most maps drastically enlarge the size of the Northern hemisphere countries and diminish the size of the Southern hemisphere countries. This traditional bias leads most people to overestimate the importance of the developed nations based on their inflated appearance. The updated 2014 Peters Projection Equal Area map comes laminated (3 mil, edge seal). It is shipped in a brown cardboard tube and/or box. An explanation is enclosed with the map including comparisons to other common projections (Mercator, Van der Grinten, Robinson, Tripel-Winkel, etc.). Available in other formats also: such as laminated gift tubed and paper folded. Also available from ODTmaps as an 11x17" desktop map for the classroom ISBN 978-1-931057-41-7
