seasonal summer jobs in each of the fifty states, but it also lists some employment opportunities overseas and in Canada. There is a section devoted to employment in the National Park Services which I found especially useful. It lists all the national parks nationwide and the criterion for the different types of jobs. From amusement parks to summer camps, this book lists literally hundreds of summer opportunities for the "vacationing" student. A typical explanation lists the dates of the job, requirements, application information, and detailed account of what one will be doing. A breakdown of the typical employee (ex. female 40% male 60% or 10% college students 60% retirees) was especially useful. It helped me find the ideal summer job and provided a huge pool to chose from. Overall, the best, most informative, and extensive book on the subject that I have ever seen or read.
