National Geographic Maps - Adventure : Philippines (National Geographic Adventure Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Philippines (National Geographic Adventure Map):

3 of 3 people found the following review helpful. GreatBy OilwelldoctorI live on the big island of Luzon so my comments are based the conditions here. Major roads are clearly marked and many of the smaller villages which are ubiquitous, are shown. The map itself is made from some type of plastic that seems quite strong and will resist the frequent downpours during the rainy season. This is a must if you are planning to travel the PI (which I highly recommend). If you think Google Maps will suffice, you are mistaken. I will order two more. One to glue onto my wall as the map is printed on two sides. The other to take with when traveling. This, with a Garmin should suit a trek quite nicely. Thanks!1 of 1 people found the following review helpful. Not sure what this is actually useful for.By bobYes, it is a map of the Philippines. Not really detailed enough to very useful in any particular area. Not sure what adventures you could actually rely on this map for as nothing is really big enough to see much detail. It is a well made map, waterproof, durable, and printed clearly. I used it on a trip that included Boracay, and sailing to Palawan. There is tons to do and explore in Palawan, almost none of it represented here. There are some vague diver icons on the map over a very small subset of extremely well known dive spots. Nothing you wouldn't figure out within 10 minutes of arriving in an area and arranging a tour. And if you were doing it on your own, you'd never make it on this map alone.2 of 2 people found the following review helpful. Good map with one exceptionBy EverleighPaper and print quality and content are great, something I expected from National Geographic. However, I do not like how the country is split in two: the northern half on one side, the southern half on the reverse. I wanted to be able to see see the entire country at once.

Waterproof Tear-Resistant Travel MapThe Philippines, an archipelago of over 7,000 islands in southeast Asia, offer an extraordinary fusion of cultures and rich biodiversity. National Geographic's Philippines Adventure Map provides global travelers with the perfect combination of detail and perspective in a highly functional travel tool. Each of the three principal geographic divisions of the country Luzon, Visayas, and Mindanao are detailed. The front side of the print map shows Luzon and includes an inset of the Batanes province. The Visayan Islands, Mindanao, and an inset of the province of Tawi-Tawi are shown on the reverse side. Cities and towns are easy to find with the maps helpful index. Highways and major roads as well as minor and secondary roads are clearly designated and include distance in kilometers so travelers can easily plan their best route. National parks and reserves, World Heritage sites, hot springs, beaches, points of interest, and areas for surfing and diving are indicated so travelers can take advantage of the Philippines many natural attractions and activities. The locations of airports, airfields, railroads, and ferry routes take the guesswork out of travel around the islands. Every Adventure Map is printed on durable synthetic paper, making them waterproof, tear-resistant and tough capable of withstanding the rigors of international travel. Map Scale = 1:1,300,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

About the AuthorFounded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
