From Brand: Univ of Pennsylvania Pr : Professions and the French State, 1700-1900 before purchasing it in order to gage whether or not it would be worth my time, and all praised Professions and the French State, 1700-1900:

This collection of essays represents the first focused attempt to treat the professions in France as a single large historical problem. It is at once a contribution to the history of the professions and to the social history of France. The essays point toward a common conclusion: in the French context, by striking contrast to standard Anglo-American assumptions, professional "autonomy," power, and success virtually require "dependence" on the state.

About the Author Gerald L. Geison was Professor and Director of the Program in the History of Science at Princeton University.
