The beauty of general surgery is putting different but important pieces of information together to find the answer. It is like putting pieces of a puzzle together. The market is full of either massive textbooks or deficient handbooks. This book is not meant to discuss in-depth the disease but rather put all the important principles and knowledge together to achieve the clearest picture of different surgical diseases. The book uses a to-the-point approach and outlines important points for patient care, rounds and even board examinations. This book will help the surgical student or resident to become a well-rounded surgeon.

About the Author Hassan Bukhari, MD, Assistant Professor (Umm Al-Qura University, Saudi Arabia), Consultant in General Surgery (Canada, USA) and Trauma/Surgical Critical Care (Miami, USA). He teaches residents and medical students. During his own medical school, residency and fellowship, he carefully mined countless textbooks, handbooks, and articles before judiciously setting out to compile his own notes to result in this, his first, up-to-date and concise, yet thorough, book.
