**Rob Reid : Reid's Read-Alouds: Selections for Children and Teens** before purchasing it in order to gage whether or not it would be worth my time, and all praised Reid's Read-Alouds: Selections for Children and Teens:

In this timesaving resource, Reid makes reading aloud to children and teens easy by selecting titles in high-interest topics and providing context to spotlight great passages. Make reading fun and exciting with: passages from 400 titles

encompassing fiction and nonfiction; advice on how to prepare for a read-aloud; a subject index to make program planning easier; and, bibliographic information on all titles. You will find plenty to engage your audiences and reinvigorate programs!

From School Library Journal As an extension of his column in Book Links, Reid has collected 200 titles published between 2000 and 2008 that have both readability and general kid appeal. The titles are organized alphabetically by author, and the book includes subject and age-level indexes. Each selection has a cursory summary, grade-level range, and a suggestion for a 10-minute read-aloud, which either provides an introduction to the main characters or a glimpse into the story, usually enough to and make young readers want to pick up the book on their own. This last part is what makes the book so useful. Many librarians rely on the collective knowledge of their peers to create bibliographies, make recommendations, and share books with readers, and a resource such as this makes that job a bit easier. As the field of children's literature continually expands, bibliographies that offer a focused view become more and more valuable.
