According to the description this map is Publisher: Natl Geographic Society Maps; 3 edition (August 1, 2004). What sent me was an older 2000 edition. When it comes to this type of map for offroad trails etc, four years makes a huge difference...I have returned this map along with two other maps ordered at the same time that was also older editions (#782 and #779 - 782 should be 2004 received 2000 and 779 should be 2008 received 2006) needs to ensure they are sending the correct editions....3 of 3 people found the following review helpful. These maps are always reliableBy Zachary G. RobbinsPurchased this map mainly for the Roan Highlands area. I wish that this section wasn't in a corner of the map and split between the 2 sides, but that's what happens. These maps are always the best though.0 of 0 people found the following review helpful.
