TittleMy spouse and I travel often and far almost always alone...never learned how to get along with others...so we rent cars and drive the world. As a consequence, we are well acquainted with the quality of maps. As the navigator, my wife gets to study them each kilometer/mile we travel. In short, she loves this one the most for its clarity and durability. Well done Hema!!!2 of 2 people found the following review helpful. the bestBy B. BatesHEMA produces some of the best maps available. I like the continuity between the individual maps (their spiral bound ones) and I like the heavy duty paper that they print on. They will last a long time. Also useful are the GPS grids, although somewhat limited by the large grid scale.0 of 0 people found the following review helpful. GET READY FOR ZOMBIES!By Thomas BigelowWorks well. Now in my hilarious bugout bag.

One of a series of 6 maps covering the United States, the Southwest features the crisp clear cartography that Hema is known for. It has an easy to read driving scale of 1:200.000 whic allows for more detail while still being easy to fold. The map is city indexed and includes major city indexes and GPS compatible map grids.

About the AuthorHema Maps are world renowned for the accuracy and clarity of their mapping.
