When I read s. sanweet's profile, he's a big wig at lucasfilm, I initially thought "this guy is only trying to making us feel jealous about his collection". Big mistake! Steven is a really down to earth guy and possess the best quality that collectors, like myself, appreciate the most: he is sharing his collection not showing off, the quality of the paper, matches the beauty of the images, those are only topped off by the amazing, heart warming tales behind how he got the stuff, very similar to Kirk hammett's horror business book. and, no, I don't want a job as his assistant, but it'd be great0 of 0 people found the following review helpful. Drool WorthyBy Doug BrunellI you grew up on the original Star Wars trilogy and remember all the hype that went with them ... and those are fond memories ... then there is no reason for you to not own this book. As I write this it is going for \$14. It is a steal at double that price. There is so much information and so many photos here that you could spend days trapped between

its covers, and if you think you know everything there is to know about Star Wars collectibles, think again. You are, quite simply, wrong. I'll admit to being a Star Wars fanatic. I'll admit to even like "The Phantom Menace." For a person like me, reading this book is like stepping into a pop culture museum. Admittedly, some of the items are ridiculous, but you marvel at them nonetheless. And some of them are works of art in their own right. Amazing book. Buy it now. 1 of 1 people found the following review helpful. wonderful book on Star Wars collecting By DI was once lucky enough to have been included on a tour of Steve Sansweet's collection with notes being taken about certain items of his collection during that tour so they could be included in this book. I've been waiting with baited breath for this because there is no way you can see but a fraction of his collection. The big stuff, sure. All the normal sized stuff just kind of blurs together in your memory once it is over, and even then you'll never see it all. This is an absolutely wonderful cross-section of his collection, with some lovely little stories about the items or how they came into his collection. I don't care how much of a fan of Star Wars you are, I guarantee that there are many collectibles in this book you've never heard of, or have heard of but never seen, and some you are probably going try to search for to own for yourself. I know I am. There are the original toys figures all the way through the very expensive high-end stuff. There are prototypes that never made production, artist one-offs, custom items, displays, signs, clothing, food, statues, coins, costumes, computers, games,... I could go on for quite a while. Darth Vader slippers. A Star Wars savings passbook. A stormtrooper golf bag. How about Star Wars Cheeselicious? You haven't lived until you see that. A must own for anyone who collects (even in small amounts, like me) of Star Wars memorabilia. Thank you Steve and Anne, for this book. Now my wife will have to keep me off and ebay for a while so I cannot purchase any of these items.

Star Wars: 1,000 Collectibles takes the reader on a journey through cool and kitsch, from toys and costumes to life-size statues made of LEGO bricks to consumer goods such as candy, clothing, toothpaste--and much more. Drawn from the largest private Star Wars collection in the known universe, this stunning treasure trove of memorabilia and colorful anecdotes mixes fun with nostalgia, delighting both the casual fan and the serious collector. Since the first Star Wars film opened in 1977, George Lucas's epic space fantasy has become not only one of the most successful entertainment franchises of all time, but also an obsession for collectors around the globe, who have spent more than \$15 billion on Star Wars merchandise.

About the Author Stephen J. Sansweet is the author or coauthor of 14 books (12 of them on the Star Wars saga) and the director of content management and head of fan relations at Lucasfilm. He was formerly the Los Angeles bureau chief of the Wall Street Journal. Over the years, Sansweet has amassed the largest private collection of Star Wars memorabilia in the world, which he houses at a place called Rancho Obi-Wan. He lives in Northern California. Anne Neumann is the resident collection manager at Rancho Obi-Wan, where she uses complex databases and photography to track and organize the more than 75,000 items in the collection.
