Best backpacking map series I've seen in decades of use By Wayne I've found this series the most accurate and complete maps for the backpacker and have been using them for decades. has a more complete set than any local backpacking store I've ever been in. The maps are easily followed and coated to protect them from the weather. In all the years I've only managed to punch a hole in one and it did not extend further into the map. These are good quality and well worth it. 5 of 5 people found the following review helpful. So much better than a computer map! By Timothy This map is amazing! I tried navigating the George Washington National Forest with my iPad. It was OK, but I wish I had this map. The detail and perspective is better than anything you can get by looking at a computer screen or printing a map from an online source. It is also well made with tear and water resistant paper. 0 of 0 people found the following review helpful. Best maps By Patrick This map will get you unstuck. What else do you want? And it's waterproof.
