DK : Sticker Encyclopedia: Dinosaurs before purchasing it in order to gage whether or not it would be worth my time, and all praised Sticker Encyclopedia: Dinosaurs:

1 of 1 people found the following review helpful. Not for a three year oldBy Beth SargentI bought two sticker books from this brand. The Ocean sticker book is great for my seven year old. The dinosaur sticker book,however,is a disappointment. First,for some reason the stickers are not grouped according to the corresponding page. I thought maybe I could do this activity with my three year old son,but found it very frustrating. Second,there are a handful of dinosaurs that don't exist! A couple of them have already been disproved such as the one covered in feathers. My science-loving Husband was not happy.I wish I had bought the transportation option from this series for my son,he would have been able to figure that one out. Finally,I just opted to show him the colorful scenes in the center of the book and he chose dinosaurs at random to ad to them. Better than nothing.1 of 1 people found the following review helpful. Definitely cool for a dinosaur enthusiast.By emmaWell, my four year old grandson loves this. I gave it to him

for Christmas and his mom,dad, Aunts, Uncles, other grandparents were all required to help put the stickers in the correct spots. He is obsessed with dinosaurs and their names and their characteristics. All he wanted for Christmas were Dinosaur books, and toys. So it was great. Mom and Dad, I think were glad when all the stickers were done. They assured me that this book has over 600 stickers. I liked it also.0 of 0 people found the following review helpful. My son has loved this bookBy MeganMy son has loved this book, but the stickers are all mixed up on the sheets so it's kind of complicated to figure out which page they go on.

Dinosaurs features stickers and facts about every kind of dinosaur imaginable, from towering T-rex to wily Compsognathus. More than just sticker books, DK's Sticker Encyclopedias feature a wealth of facts and jaw-dropping statistics. Readers can use the book's hundreds of stickers to illustrate these facts, create their own scenes, or add some pizzazz to their school supplies and lockers.
