This book came out in the mid '90's I think and unfortunately the business has changed a bit since then. That being said, there is still plenty of good information in the book and as far as I know it's the only in depth manual of it's kind. If you are trying to break into the biz I would recommend this book.

Being a stuntman is a highly paid, challenging, daredevil profession. Stuntman teaches you required stunts - how to

get burned alive, wreck cars, swing from nooses, roll down stairs and fall off horses - as well as marketing techniques that let you in on secrets agencies try to keep to themselves.
