**T.S. Pattie, Scot McKendrick : Summary Catalogue of Greek Manuscripts, Volume I (The British Library Studies in the History of the Book Series, 1)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Summary Catalogue of Greek Manuscripts, Volume I (The British Library Studies in the

History of the Book Series, 1):

A comprehensive guide to one of the world's greatest collections of Greek manuscripts. Fully indexed, it describes all the Library's manuscripts in the Greek language, with the exception of the separate collections of papyri and ostraca. Ranging in date from the 3rd century B.C. to the present century, these manuscripts comprise mainly Biblical, patristic, liturgical, classical texts, but also includes papers of scholars relating to Greek texts. This first volume describes nearly 600 manuscripts that form part of the Arundel, Burney, Harley, King's, Landowne, Royal, Stowe and Yates Thompson collections or which have been added to the continuing series of Additional and Egerton Manuscripts since 1925. There is also a list of facsimiles, microfilms, and photographs of Greek manuscripts in other institutions held by the British Library.
