I always give it as part of a baby shower or announcement gift together with some practical medical items in a kit. Everyone always gives cute clothes, etc., but

forgets that babies get sick easily! I am in the medical profession and have this book myself...and it is dog eared from use! Highly recommend it. What is best, is that it covers both physical and emotional development, and starts from the time you find out you are pregnant. Very easy to use, helps you diagnose common issues, tells you home remedies and then what to expect if going to the Dr. is recommended. 1 of 1 people found the following review helpful. Great medical resource for over 30 years By Mtnmom I used a much earlier edition of this book 30 years ago with my own children, and found it so helpful that I just ordered copies for both my adult children to use with their children. I especially like the flow chart layout in the book. It asks you questions that can be answered with a "Yes" or a "No", and guides you to the appropriate action. Very informative, clear and easy to understand. I highly recommend this new edition! 0 of 0 people found the following review helpful. I used this book 35+ years ago with my own ... By Tricia H. I used this book 35+ years ago with my own child and I give the updated version of it frequently as baby shower gifts. So helpful to know when to seek outside medical treatment and things one can do at home. Clearly written and very well organized!! I just advise against first time expecting parents reading through all of it at once, as it will freak you out thinking about all the illnesses and injuries possible for children! LOL!

Winner of the American Medical Writers Association Book Award The award-winning go-to guide that has helped millions of families keep their children healthy now revised and updated with the most recent advances in health care For more than thirty years, "Taking Care of Your Child" has been an indispensable resource for parents and caregivers. Covering more than 175 health care problems and symptoms, it offers the most recent information on critical childcare issues from what to do in the event of a minor injury to everyday issues such as common allergies and ailments. "Taking Care of Your Child" is easy to use, even in a crisis: you can simply look up a symptom to find a complete explanation of probable causes, how to treat the problem at home, and when to see a doctor. With the very latest on ADHD, autism, breast-feeding, childhood depression and obesity, discipline, immunizations, and more, this new edition also features new sections on youth sports and head trauma, genetic screening, and minimizing risks of medical procedures."

About the Author Robert H. Pantell, MD, is Professor of Pediatrics Emeritus at the University of California, San Francisco. As Chief of the Division of General Pediatrics for over two decades he trained more than 200 pediatricians and pediatric academic advisors. He currently serves as Medical Director, Child Protection Center, Kapi'olani Medical Center for Women and Children. James F. Fries, MD, is Professor Emeritus in the Immunology Rheumatology department at the Stanford School of Medicine. He has won multiple awards: ISI Highly Cited from Web of Science (2009), Research Hero from Arthritis Foundation (2000), Clinical Research Award from American College of Rheumatology (2005), and Master of Rheumatology, American College of Rheumatology (2003). Donald M. Vickery, MD, founded Health Decisions International, a self-diagnosing software tool for doctors and patients. He helped develop the first medical decision charts for non-doctors and was the head of the nonprofit Self-Care Institute. Dr. Vickery was president and chief executive of the Center for Consumer Health Education, based in Evergreen, Colorado, from 1980 to 2008. He passed away on November 22, 2008. Fries and Vickery also coauthored "Take Care of Yourself."
