MD, FAAEM, FACMT, FACEP, Editor in Chief, Richard J. Hamilton : Tarascon Pharmacopoeia 2012 Deluxe Lab Coat Edition (Tarascon Pocket Pharmacopoeia) before purchasing it in order to gage whether or not it would be worth my time, and all praised Tarascon Pharmacopoeia 2012 Deluxe Lab Coat Edition (Tarascon Pocket Pharmacopoeia):

27 of 29 people found the following review helpful. Tarascon Pharmacopoeia? Never again!By Dr. PaulLast year I didn't buy Tarascon because somebody reviewed and indicated that there was a typo in the peds section. For the last 3-4 years the company discontinued providing clear removable plastic covers. The plastic cover was very good b/c I could often clean it with alcohol wipes, it made the book durable, and I could often store business cards, etc. in the interior folds of the plastic cover. I contacted Tarascon numerous times during the past two years, and they said that they will re-issue the plastic covers this year. Last time I asked, they said they won't. I went to Kinko's and Office Depot for a solution to no avail. Frustrated, I looked in the Internet to find somebody who manufactures custom book covers, again without success. I came across quite a few Internet postings by medical students and physicians, complaining as well. In addition, the new book has a new narrow type face with ever smaller characters. The color of letters is almost grey and the back ground is darker so the contrast is intolerably bad. Paper quality also appears to have suffered, it's thick and inferior compared to previous versions. It causes a lot of eye strain and I have to use a different set of reading glasses to be able to read. (2.00D vs. 1.50D that I normally use!) To make the things worse, I found a typo within the first 10 minutes(!)I spent with it. Cefdinir section does not show it's also "Omnicef." You can't find Omnicef in the book! Coupled with other readers' comments from the previous year, the reliability of this book for a medical professional is now questionable in my eyes. I understand that the company had changed owners a couple of years ago. I also understand that the price is cheaper than previous years. Nevertheless, I would not give \$5 for this book. I do not recommend it unless stranded on a deserted island with 2.00D reading glasses. For having used Tarascon products for decades as a loyal customer, it's hard to let it go.0 of 0 people found the following review helpful. A must for any RNBy Mitzi S.A great reference for any new RN. I have carried one of thes in my pocket since becoming an RN in 2000. Highly recommend!! There are some references that just need to be on paper! This is one of them...0 of 0 people found the following review helpful. IndispensableBy Kristi SwedeReadable type in this larger size, accessible information, excellent charts and helpful cost guidance. There isn't much that gets desk or pocket space these days, but this book is in my small pile of essential books.I'd go so far as to say the beginning clinician might spend a weekend reviewing this book with a highlighter and some flags; it will save you hours when on the wards or in the primary care office.

Used by prescribers around the world, including: physicians, pharmacists, nurses, physician assistants, dentists and medical transcriptionist, the Tarascon Pharmacopoeia, 2012 Deluxe Lab Coat Edition continues its tradition as the leading portable drug reference packed with vital drug information to help clinicians make better decisions at the point of care. The Tarascon Pharmacopoeia, 2012 Deluxe Lab Coat Edition is an expanded version of the Classic Shirt-Pocket Edition, containing more drugs, evidence-based off-label indications for adults and pediatric patients, and additional tables. The 2012 Deluxe Lab Coat Edition also includes typical drug dosing (all FDA approved), available trade and generic formulations, metabolism, safety in pregnancy and lactation, relative drug pricing information, Canadian trade names, and an herbal alternative therapies section. Multiple tables supplement the drug content, including opioid equivalency, emergency drug infusions, cardiac dysrhythmia protocols, pediatric drug dosing, and much more. Each edition is meticulously peer-reviewed by experts and are also available in for iPhone, iPad, Android and Blackberry devices.
