**Igor Popovich : Teach Yourself Winning at Job Interviews (Teach Yourself Business Skills)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Teach Yourself Winning at Job Interviews (Teach Yourself Business Skills):

Whitemore There are so many books on job interviews it is hard not to get confused. I bought a few at my local bookshop and liked this one best. What attracted me to it was fact that it was written by a migrant (just like myself, I'm originally from UK but living in Australia now). I like the author's quirky but no-nonsense style. For the amount of information and advice it contains, this is an absolute bargain! There are 300 or so questions discussed and each one has a model answer suggested, of course, to be modified by your own situation, experience and communication style. I particularly liked the author's stories from his own interviewing experience, written in a tongue-in-cheek style, but very valuable and entertaining. This is not some theoretical discourse but a practical manual. The last section, giving specific advice to women, migrants, school-leavers, job-hoppers and similar categories of job-hunters is worth the price of the book alone!

This guide to being successful at job interviews also includes the etiquette of modern job applications, including email and faxes, as well as new theories and practices in recruitment.
