disappointment in a sense that it only applies towards senior management jobs. For some reason, author of this book assumes that only senior managers make \$100K/year. Anyone else who is in a professional field (medical, law, technical) is excluded from this book because book only applies to managerial types and by that I mean general management professionals only. Skip this read, there are better interview books out there.0 of 0 people found the following review helpful. Put yourself in the interviewer's shoesBy S. AndersonThis book ties in nicely with Enelow's other \$100,000+ books on resumes and cover letters. Most useful are her case studies and sample answers to the tougher questions (read: deal-breakers). She also has some wonderful sample follow-up letter samples. Overall, I think she's an excellent writer and personal brander and my job hunt has been more successful with the use of her books.

This unique book examines the agenda of top interviewers, specifies key skills and personal/professional characteristics, explores tough interview situations, and outlines important steps to prepare for a successful interview and offer. Filled with rich interview advice for executive search candidates.
