(Though I didn't time my read through-- nevertheless, it could be read in a lunch break.) A great quick read, that respects the working professional's time. This brevity is important, in that anyone looking to read this is likely looking to find a new job, and they don't want their

self-help manuals to be a new job in it of themselves. There is no irrelevant information, or self-serving dictation that I've seen in a few other like books. Just the tools, and practical means of practice and execution of them. Perfect workbook for polishing the Professional Face. Highly recommended! It cuts a lot of the intimidation factors in the entire job application process to bits.0 of 0 people found the following review helpful.
