Michelle Harris : Transport (Illustrated Science Encyclopedia) before purchasing it in order to gage whether or not it would be worth my time, and all praised Transport (Illustrated Science Encyclopedia):

Looking at each method of transport in turn, this in-depth book examines the developing technologies through the ages and charts discoveries. Includes over 40 projects.

About the AuthorMichael Harris, has been writing and consulting on the subject of trains and railways for over 30 years. Peter Harrison he is the author of two children's information books on famous painters and is currently a

freelance writer and editor. Peter Mellett, he has worked as an editor, writer and consultant for many children's and adult educational books. Chris Oxlade has worked as a writer and editor on more than 70 books, and he has written mainly for children but occasionally for the adult market. John Rostron he has published papers in the applications of mathematics to biology and is a consultant to children's reference books.
