My son received this as a Christmas gift, and the binding on the case started peeling away as soon as he opened it. When you open the case, one side holds the DVD and one side holds the book. Both sides started separating from the case the first time he took the book and DVD out. I figured it was a mistake and exchanged it. With the second set, the glue binding on the book pages did not hold, and the pages started separating and falling out within 1-2 months. By that time, it was past the return window. My son is not tough on items, is generally careful, and had only looked at the book 5-10 time. Very disappointed.1 of 1 people found the following review helpful. Not really for kids...By ahey89The "Discovery Kids" really threw me off...This is really more of a DVD for teenagers/adults in my

opinion. Bought this for my 4yr old daughter who is very interested in dinos. Thought since it was by "Discovery Kids" it would be more simple. Luckily she is happy watching it but not too sure how many kids would enjoy watching this and could sit through this. Would not recommend for kids younger than 10.0 of 0 people found the following review helpful. Good BookBy easy writerMy nephew really loved the book. He is big Dinosaurs fan.
