Ultralight and Microlight Aircraft of the World 1By Cresco750If you are interested in the early beginnings of microlight / ultralight aviation then this is a must-have book. Although it does not cover ALL ultralights during this period it does cover a vast majority of those that were in production in the early 1980's. The second edition of this book covers 1985-86 and is just as good; be sure to get hold of both of them!Highly recommended.
