To perusing shelf after shelf of amazing VHS garbage, hoping against hope you'd find something amazing?Look no further. From the oh-so-great snippets of dialogue atop each page to the fantastic festivals themselves, Morse organizes the 'films' in an inventive way and then churns out scathing reviews.Pandora, open the niche hidden in the belly of Jove. This book is terrific.2 of 7 people found the following review helpful. Too limited.By J. CarrollWhile many books are reviewed in capsule form the author limits himself to repetitive comments like "time waster" or "time passer." With A, B and C movies mixed together in what the author refers to a festivals, the book lacks a consistent critical focus. Limited to movies from 1980-1989 this series is not really that useful. For a better take on the genre check out Michael Weldon or Danny Peary.

Describes more than five hundred police, women's prison, martial arts, and mystery films.
