It's large enough to put pins in. If you get up close, you can see most areas and major roads clearly. Note that this is just of the state and it is a little hard to read the surrounding areas that are more greyed out. It came in a tube, so it ready to roll out and onto the wall. No creases like the traditional road maps.2 of 2 people found the following review helpful. Useful State MapBy From My PerspectiveThe laminating quality is excellent. The map is large, includes great detail and is very legible. I find it very useful to refer to for the project I am working on at present. I have it mounted on my wall using tacks...so the lamination weight matters. Overall --high quality. I would purchase other state maps of this brand from this vendor.2 of 2 people found the following review helpful. Great detailed map.By JoshuaGreat detailed map. It is a strange size if you are trying to mount it. But the tradeoff is that it's big, which is nice.

Explore the forested islands of Puget Sound, the snow-capped Cascades, and the agricultural basins fed by the Columbia and Snake rivers with National Geographic's wall map of Washington. Part of the growing series of State Wall Maps, this map offers a dramatic visualization of the Evergreen States physical geography. Stunning shaded relief and vibrant colorization depicts mountain ranges, forests, valleys, and other physical topography. In addition to the geographical features such as mountain ranges, prominent peaks, islands, major lakes, rivers, and reservoirs, this map includes the location of cities, towns, airports, national and state parks, and military bases. The Pacific Crest Trail, a long-distance hiking and equestrian trail to runs through the entire state from the border with Canada into Oregon, is shown as well. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:652,174Sheet

Size = 40.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
