**Bryan Pfaffenberger : Webster's New World Computer Dictionary, 10th Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Webster's New World Computer Dictionary, 10th Edition:

0 of 0 people found the following review helpful. to a better understanding of Computers and the terms/languageBy felrodriosa must have, to a better understanding of Computers and the terms/language!5 of 5 people found the following review helpful. Too Bad it's Not ThickerBy William F. NappiAlthough much appears to be AND is

outdated, A LOT of the more basic definitions apply to the technologies in use today. SOME terms are antiquated, some are obsolete BUT many, many are not. Well written too. 1 of 1 people found the following review helpful. Outdated for 2015 By Alphonse Gomtibo Outdated for 2015. This edition was released in 2003 when Windows was still at its XP version! Lots have changed since then.

Whether you're a computer novice or a computer professional, Webster's New World Computer Dictionary is one of the most useful references you can buy.
