Five StarsBy Staci CarperGreat book and in excellent condition.0 of 1 people found the following review helpful. Excellent companion to readingBy Scott D. StephensI needed a good map set for some reading I am doing on the eastern front of WWI and this fit the bill. There were many areas I was not familiar with and this aided my reading by allowing me to visualize the cities and terrain associated with the campaigns. I only gave it 4 Stars since I always want more details and maps than most books have in them. Having said that it is an excellent stand alone or reference work.

World War I marked the end of the old military order and the beginning of the era of mechanized warfare. This is a thorough examination of the campaigns of the war to end all wars. It analyzes the development of military theory and practice from the prewar period of Bismarks Prussia to the creation of the League of Nations.

"Excellent...the strength of the books is in the operational military history, and they present well-argued evaluations of the wars' commanders and campaigns." (Library Journal)About the AuthorThese titles were developed and written by

the faculty of the United States Military Academy at West Point. Weaving the complexities of individual historical conflicts into a broader perspective, these books chronicle the turbulent periods of civilization. Utilizing their expertise as scholars and soldiers, the authors shed light on the crucial events and factors that shaped the execution of the world's great military campaigns. Photographs, illustrations, and maps of the campaigns thoroughly researched for historical accuracy are either included in the books or available as companion atlases. Each volume focuses on a specific era of warfare, bringing you into the thick of battle with a clear and accurate picture of men at war.
